

U.S. PAVERSCAPE®

Manufacturer of Fine Quality Concrete Paver Brick, Tile and Slabs

U.S. PAVERSCAPE SPECIFICATIONS

I. Product

Solid concrete interlocking 2 3/8" pavers.

II. Manufacturer

U.S. Paverscape, LLC.
1735 SE Federal Highway
Stuart, FL 34994
(772) 223-7287

III. Materials

Cementitious materials made from Portland cement, sand and stone aggregates, integral admixtures, and minimal water to create a no-slump concrete mix design. This mix is then molded into Paver shapes under extreme high vibration and frequency to achieve significant strength and durability. Color pigments are usually added with a proprietary blending process to create a wide array of solid or blended colors. This process combines modern automation with hand made variegation techniques to create a harmony of high quality color ranges.

IV. Physical Requirements

U.S. Paverscape pavers are manufactured to meet or exceed the standard specification for "Solid Concrete Interlocking Paving Units" ASTM Designation C936-82.

- Average compressive strengths will meet a minimum average of 8,000 PSI with test procedures in accordance with ASTM C-140 standard.
- Maximum water absorption factor shall not exceed an average of (5%).
- Excellent abrasion resistance with test procedures in accordance with ASTM C-418 standard.
